Anti-slip protection with **Frixion™** upholstery

ergoCentric®
The science of sitting®

“

Everything should be made as simple as possible, but not simpler.

”

- Albert Einstein

ergoCentric®

ergoCentric, grounded in the philosophy of The Science of Sitting® since 1990, specializes in creating ergonomic seating and workspace solutions. Our focus is on designing products that promote health and productivity by ensuring proper support and comfort for individuals as they work. With our exclusive patented modular technology, ergoCentric can ensure the workstation adapts to the individual to promote well-being and productivity.

Frixion™

Recommended for
healthCentric® seating

Improved safety & comfort

Anti-slip seating surface reduces falls off of chairs and stools, increasing the ability to engage with the lumbar support.

Cleanability

Withstands hospital grade cleaners and disinfectants, helping prevent the spread of pathogens.

Increased productivity

Promotes concentration and improves performance and patient experiences.

Guaranteed quality

Frixion is backed by a 5 year warranty and has been tested for quality, durability and ergonomic function.

Laboratory seating solutions

ergoCentric offers comprehensive laboratory seating products from fully adjustable chairs and stools to cleanroom and ESD chairs to support the tasks required in a laboratory environment and increase comfort, health and productivity. These seating solutions can be specified to meet the unique demands of laboratory work and the needs of the workforce. Unlike traditional lab seating, which often comes with hard, slippery vinyl surfaces, ergoCentric seating can be optioned with Frixion anti-slip upholstery which greatly minimize the risk of slip-and-fall incidents, a common concern in environments where spills and slick surfaces are frequent.

Partnering with customers, we actively seek real-world solutions to their seating issues, working to improve users' comfort and safety while ensuring our products are easy to clean and disinfect.

We design our seating products based on the demands of ergonomists, occupational therapists and physiotherapists, and are focused on the well-being of the people who sit in our chairs. Our chairs are fully adjustable and modular, fitting various environments, tasks, and anthropometric needs.

By incorporating ergoCentric laboratory stools and chairs with Frixion into their facilities, laboratories can significantly improve the work environment. The ergonomic benefits of these seating options support better posture and reduce the strain on the body, leading to increased comfort and decreased risk of injury for lab personnel. This focus on ergonomic support and safety not only boosts the productivity of the staff by allowing them to work more comfortably and efficiently but also signals the facility's commitment to their employees' health and safety.

ergoCentric cleanroom chairs are easy to clean and provide superior ergonomic comfort and modular design for the perfect fit. Cleanroom chairs meet air cleanliness specifications for: Federal Standard 209E Class 1, 10, 100 and 1000 environments as well as ISO 14644-1 Class 3, 4, 5 and 6 environments.

Our laboratory seating products are GREENGUARD® Gold certified, meet or exceed ANSI-BIFMA Standards, and are backed by a comprehensive warranty.
